

## *Sustainable Winemaking Ontario: An Environmental Charter for the Wine Industry*

### **TAB 1 - Introduction to Contents**

This binder includes the following documents (in order):

- *TAB 2 - Sustainable Winemaking Ontario: An Environmental Charter for the Wine Industry – Eco-Winegrowing 101*
- *TAB 3 - Sustainable Winemaking Ontario – Environmental Best Practice for Wineries*
- *TAB 4 - Sustainable Winemaking Ontario – Environmental Best Practice for Winery Hospitality Services*
- *TAB 5 - Sustainable Winemaking Ontario – Viticulture Pilot Addendum to the Canada-Ontario Environmental Farm Plan*
- *TAB 6 - Sustainable Winemaking Ontario – Energy Best Practice for Wineries*
- *TAB 7 - Developing Energy Benchmarks for the Ontario Wine Industry*
- *TAB 8 - Sustainable Winemaking Ontario – A Newcomer's Primer: The Environment and the Wine Industry in Ontario*
- *Insert - Reducing Waste and Making Money. A Concise and Practical Guide to Pollution Prevention in Wineries*

The bulk of this material is also available in PDF form on the accompanying disc version of *Sustainable Winemaking Ontario: An Environmental Charter for the Wine Industry*, available from the Wine Council of Ontario.

In addition, *Sustainable Winemaking Ontario – Environmental Best Practice for Wineries* and *Sustainable Winemaking Ontario – Environmental Best Practice for Winery Hospitality Services* have also been developed as an interactive spreadsheet, and are available from the Wine Council of Ontario.

Sustainable Winemaking Ontario is an initiative of the Wine Council of Ontario and has been funded by the members of the Wine Council of Ontario. The WCO has been supported by its partners – the Grape Growers of Ontario and Niagara College.

Additional funding has been received for some specific elements of Sustainable Winemaking Ontario:

*Sustainable Winemaking Ontario - Viticulture Pilot Addendum to the Canada-Ontario Environmental Farm Plan* -The Grape Growers of Ontario provided funding to publish this document. Support and funding for the development of this document was also provided by the partners of the Canada-Ontario Environmental Farm Plan, Agriculture and Agri-Food Canada and the Ontario of Agriculture, Food and Rural Affairs. The ability to deliver this element through the Canada-Ontario Environmental Farm Plan was made possible with the collaboration of the partners of the Canada-Ontario Environmental Farm Plan (EFP) program. The Canada-Ontario EFP program is administered by the Ontario Federation of Agriculture (OFA) acting on behalf of the Ontario Farm Environmental Coalition. OFA has signed the contribution agreement with Agriculture and Agri-Food Canada. In turn, the Ontario Soil and Crop Improvement Association is contracted by OFA to deliver the program to agricultural producers. Funding for the Canada-Ontario EFP program is provided under the Agricultural Policy Framework, a federal-provincial-territorial initiative.

*Sustainable Winemaking Ontario: Energy Best Practice for Wineries and Developing Energy Benchmarks for the Ontario Wine Industry* was supported with funding from the:

Natural Resources Canada

Ressources naturelles Canada

Agriculture and Agri-Food Canada

Agriculture et Agroalimentaire Canada

*Reducing Waste and Making Money. A Concise and Practical Guide to Pollution Prevention in Wineries* was provided by Environment Canada. The manual and its associated workshop were originally presented at a half day workshop sponsored by the Wine Council of Ontario and Environment Canada. The Wine Council of Ontario thanks Environment Canada and the author of the report and workshop, Enviro-Stewards, for making this document available.
